Mercury's small **FourStrokes** are extremely light and suited to everything from small inflatables to aluminium dinghies and punts. They also boast a range of additional features, depending on the model. These include additional noise-reducing cowls, air intake silencers and through prop exhausts for cleaner and quieter operation; electronic CDI ignition for easy start; shallow water drive; the industry's first battery-less EFI system for easier starting, smooth running and improved efficiency; and integrated handles and grips to make things much easier when it's time to take it on or off the transom.

Mercury's **TwoStrokes** are also something special – lightweight, powerful and easy to start. They are ideal for fishers, yachties or people with smaller leisure boats. Mercury's small TwoStrokes provide the dependable power that can go anywhere and keep on going. For example, Mercury's mid-range TwoStrokes feature high-volume, low-pressure, floppy-vane water impellers to help keep operating temperatures down... even in heavily silted or salty estuarine waters. Plus there's a water-separating fuel filter to keep debris and water out of your engine.

All Mercury outboard consumer products come with a fully transferable, non declining 3+2=5 Year Warranty.

These big deals on the best small outboards are available until 20th March 2015. Terms and conditions apply. To see full details go to [www.mercurymarine.com.au](http://www.mercurymarine.com.au).
