PFLUEGER® PURIST® CASTING REELS

Smooth, Compact and Lightweight Purist Casting

Engrained with a sense of durability and functionality, the new Pflueger® Purist® casting reels are driven by quality components that give anglers a reel that is dependable day-in and day-out.

The Purist casting reels are smooth, compact and lightweight thanks to a ridged one-piece graphite frame and graphite side plates that disappears in the hand. Featuring seven plus one stainless steel bearings, the Purist employs a centrifugal brake system, aluminum handle and graphite star to outlast any tough-fighting fish.

The Purist casting reel comes in a 7.1:1 gear ratio. The Purist casting reel is also available in a matching 3-5kg combo ideal for natives and light tropical situations.

The rod that accompanies the Purist casting reels has a split EVA grip and features IM-8 graphite construction giving anglers the ultimate feel and sensitivity.
